OBGYN Department

Name _____ Date _____

Routine Obstetrical Visit

Claire Clough is here for a routine OB visit at 32 weeks. The nurse reports Claire has no complaints. After reviewing her chart, go in and evaluate Claire. Record your findings below. Then make any recommendations you feel are appropriate. For purposes of this visit, assume the fetal heart rate is 140 BPM the fundal height measured 27 cm, and all other physical findings are normal.

- ✓ If a faculty member is actively engaged, they will serve as the voice of Claire Clough, while watching you remotely on two video cameras.
- ✓ If a faculty member is not actively engaged, then your interaction will be videotaped and Claire will not respond to your questions. You should still ask the questions, and assume all responses are normal.
